Theme of the Month

Compassion and Love

Use your voice for
kindness, your ears for
compassion, your hand
for charity, your mind
for truth, and your
Heart for Love.

Compassion.
It's not just a word.
It's a way of being.
It's not just a concept.
It's love in action.
Jeff Brown

Jan - 2023

World Read Aloud Day - Grade V

There is no friend as a loyal book", said Ernest Hemingway. Believing in this, TSGE celebrated World Read Aloud Day by organising various engaging activities which were not limited to the four walls of the classrooms but reached the homes of neighbours, friends and family too. The learners were engaged in activities ranging from reading to their friends within their grades, across different grades, with hardcopies and softcopies, creating mind-maps of the learning outcomes of reading aloud, and a story walk too. An unique activity of reading aloud was carried out on returning back home where the learners read out their favorite parts from books to their extended family and friends and also to their drivers, neighbours and even their maids. Must say that the bonds between the reader and the book were undoubtedly strengthened.

Let's Personify - Grade V

Believing in the power of originality, Grade V learners were encouraged to visualise a story of their own and plan. They also were encouraged to transfer these visualisations to creative doodles. It was undoubtedly an enjoyable experience. Here are a few glimpses.

Kidzania - Prep I to Grade VI

“Do not keep children to their studies by compulsion but by play”, said Plato and his words still ring true.

In cognizance with the above thought, TSGE organized a picnic to Kidzania on February 2023 for its learners from Prep I till Grade VI which is a unique and interactive indoor theme park. It gives a real- life experience to kids through role-play activities. All the learners enjoyed the tour to this theme park. By blending reality with entertainment, it provides an authentic and powerful development platform where the learners explore and learn about the real-world occupations. Learners enjoyed understanding about real-world occupations in private services, public services, entertainment industry, airline industry and other sphere of life. Students played the role of pilot, doctor, chef, firefighter, and many other professions with full gusto.

Kidzania - Prep I to Grade VI

Valentine's Day Celebration - Wonder Years

Another day, another celebration! The little ones at TSGE were invited to come dressed in red and pink to celebrate this Valentine's Day. Each classroom had a special activity in accordance with their age group to celebrate the day. The learners witnessed how to make a special chocolatey treat together with their facilitators! We witnessed a beautiful day together in harmony and love.

Global Perspective Skit- Grade V

Collaboration fuels individual strength for mutual success, and it gives us the pride to show how wonderfully Grade V collaborated and did a role play for the GP topic - World of Works. They made a questionnaire for interviewing a factory owner who was shutting his factory. The interviewer interrogated the owner, cross-questioning the workers losing their job and their families about the future plan. They talked to the robot designer who was turning the simple factory into an automated/AI-driven factory. Here is a glimpse.

Clean Environment Posters - Grade V

Save Earth! Clean Environment
Clean environment is the best teacher. She can teach you how to be happy and healthy. Let's all work together to make our planet a better place. For all 5 gifts and sounds of life. Be better.

CLEAN ENVIRONMENT
A clean environment is a healthy environment. It is a place where we can live and work. Let's all work together to make our planet a better place.

Clean Environment
Keep it clean or it will happen.

TIME IS TICKING
Let's all work together to make our planet a better place. Plant CLEAN!!!

Save the Earth
Change how to unlock CLEAN WORLD

CLEAN ENVIRONMENT
THERE IS NO PLANET B

CLEAN ENVIRONMENT
Let's all work together to make our planet a better place.

Save the Earth
Let's all work together to make our planet a better place.

Clean Environment
CLEAN UP!

Wonder Years Learners' Felicitation

Thermic Tablets Montessori - Prep II

The Montessori Thermic Tablets are a sensorial material that is designed to isolate and refine a child's thermic sense, or sense of temperature. This was a fascinating activity for learners because there is no outside force causing the tablets to differ in temperature. This opened up conversations about what each tablet is made of and why they don't all seem to have the same temperature. In activity extension they tried to pair the correct temperature with their eyes closed (enhancing their stereognosis sense). The learners also order the tablets from coolest to warmest and warmest to coolest.

Book Reading in Pre Primary Library Section - Prep II

Developing strong literacy skills helps prepare our learners not only for success in reading and writing but also in other academic fields. It also helps them become more able to interpret the world around them. At TSGE we believe in giving earlier access to the library as it's not just a place that houses books, it is a place where children learn to explore and imagine a world beyond their own, to information and learning opportunities.

Units of Measurement - Grade II

Measurement is used in our day to day life. Measurement is a technique in which the properties of an object are determined by comparing them to a standard quantity. To teach the learners different units of measurement, hands-on experience was given through balancing scales to measure the mass, thermometer to measure the temperature and measuring jars to measure the capacity. The learners enthusiastically participated in the activity.

Perimeter Activity in Math Lab - Grade IV

Grouping Activity- Prep II

Certainly our five-year-olds at TSGE find it almost impossible to stand still. Prep I learners show their understanding of numbers, while engaging in a physical activity. Variants of the counting number game to form number groups with beans or other objects onto a table was played to make learning fun. The learners were asked to make various groups of different numbers. Certainly our five-year-olds at TSGE find it almost impossible to stand still. Prep I learners show their understanding of numbers, while engaging in a physical activity. Variants of the counting number game to form number groups with beans or other objects onto a table was played to make learning fun. The learners were asked to make various groups of different numbers.

Sports Day - TSGE

Learners of all ages and abilities came together to showcase their athletic skills and spirit of competition in a day filled with exciting events and friendly rivalry. From sprints to relays, every participant gave their best in fun races, gymnastics, mallakhamb, badminton and reliving the traditional; not so forgotten seven tiles game(lagori), and yes, the melodious Band Display gave the fiesta an amazing closure.

The learners cheered each other on with great enthusiasm. It was a truly memorable day that celebrated not only physical prowess but also the values of sportsmanship, fair play, and camaraderie

Sci-Pi Day - TSGE

Sci π day, which was celebrated on 28th Feb 2023, was an exciting event that brought together Science and Math with an opportunity to explore interconnection between science and math.

During the event, The learners from Prep 1 to Grade IX, got to participate in interactive activities, experiments, and presentations that were designed to spark learners interest and engage them in hands-on learning. They found it fascinating to see how science and math can be used to solve real-world problems and how they are interconnected.

Moreover, Sci π day helped the learners to cultivate critical thinking, problem-solving, and analytical skills, which are essential in both science and math fields. The event left the learners inspired to pursue a career in a STEM-related field.

Thank You

Stay tuned for the March edition...
