MaRRs Champion

Congratulations to Mahir Malkan learner of TSGE Prep II for securing 2nd rank MaRRs National Championship 2021-22.

Planning My Story Activity

Believing in the power of originality, Grade V learners were encouraged to visualise a story of their own and plan. They also were encouraged to transfer these visualisations to creative doodles. It was undoubtedly an enjoyable experience. Here are a few glimpses.

Montessori Baric Tablets - Nursery & Prep I

In Montessori, we teach children how to differentiate between different weights by using their tactile senses with special equipment, called Baric tablets. Baric tablets are wooden tablets that are the same size, but different in weight and color. It's actually the only Montessori sensorial material that isolates and refines a child's baric sense (weight). The Baric Tablets is a pairing activity that not only helps develop the child's sense of weight but is also an introduction to the concept of density.

Life skills at TSGE Grade I and Grade III

**Who says children can't meditate?
Here are our Grade I & Grade III children intensely involved
in stillness meditation during their life skills class-
Being still creates a breeding ground for mindfulness thereby
improving memory and bringing clarity. We need to cultivate
this habit in children at an early age so that in future they've
stronger cognitive & emotional intelligences.**

Makar Sankranti Celebration - Wonder Years

Completely absorbed in the festive spirit, students celebrated Makar Sankranti with exuberance and fanfare. To mark the occasion, kite flying was one of the major attractions enjoyed by everyone. It was a sight to behold as the children raced up and down the field with cheerful faces, closely followed by a rainbow of kites trailing behind them. As some of our children were busy testing their kite flying skills, others were busy making groundnut tilguls. TSGE hopes that experiencing different aspects of the festival, have encouraged our students to be open-minded, tolerant, and respectful towards each other, embrace differences and cherish similarities in their beliefs and cultures.

Force Meter Study - Grade III

Building scientists of Grade III were seen engrossed in learning about Force and observing the related instruments

CVC Words - Prep I

One of the favorite things about learners in school is watching them grow as readers! From learning their letter sounds to be able to blend sounds together, making the transition from letter sounds to reading words is a huge accomplishment for our little readers. Here at TSGE it is a step-by-step process teaching our learners about word families that will help them become more efficient in decoding CVC words.

Butterfly Lifecycle - Nursery

Life Cycle of a butterfly - Nursery.

Our littlest ones at TSGE get in the groove of learning about the Life Cycle of a butterfly with a lot of excitement.

The hands-on felt story script is used for story time and learners learn to present the life of a butterfly using a flannel board. After introducing the story, the learners also sequence the life cycle on the board.

Cover Story Prediction Writing - Grade II

Prediction of genre was one of the first skills taught to learners Grade II. In an engaging activity they were encouraged to observe different book covers and decide whether they were fiction or non-fiction. They were later engrossed in predicting about the settings characters, and the problems that might be encouraged by those characters in fiction books. Here are a few glimpses

Pajama Party - Wonder Years

What an amazing amalgamation of colorful pajamas, mushy pillows, soft toys, and fun, during the 'Pajama Party' at TSGE, for the Wonder Years learners. Dressed up in their snazziest night dresses and carrying their favorite soft toy for a sleepover with their best friends, the children and their facilitators made the most of this day.

The highlight of the day: Bonfire with sing-along songs and Hot chocolate with marshmallows

The Play area was transformed into a haven of moon and stars with balloons and bedding to go along with the decorations. The children swayed to their favorite numbers, played games, watched a shadow puppet story, and pretended to sleep along. The children were thrilled to play with their friends, and favorite toys, and enjoyed their snacks!!

The objective behind the Pajama Party was to assert independence amongst children, to develop social connections, and to inculcate the habit of sleeping without their mommy. It was truly mesmerizing to see the little tots energetic and cheerful.

Pajama Party - Wonder Years

Cambridge Advanced Career Guidance Session - Grade X

Choose a job you love, and you will never have to work a day in your life -
Conficius

Career guidance plays a very important role in the lives of all individuals, as it helps in setting future goals and chooses career.

In order to pursue and move towards higher goals in life, Thakur School of Global Education (Kandivali West) organised a *Careers Counselling session* for Grade X students of Cambridge at TSGE on 21st January 2023. Valuable insights on upcoming careers, opportunities, procedures to choose those careers and detailed information on the various fields of designing a career was given by a guest speaker from a leading counselling firm. Learners of TSGE interacted with the speaker and cleared their understanding about various careers that lie ahead.

Republic Day Celebration at TSGE

Patriotism consists not only in waving the flag, but in striving that our country shall be righteous as well as strong.

The 74th Republic Day of India was celebrated at Thakur School of Global Education alongwith our sister school TIS-ICSE with great patriotic zeal and fervor. To mark the importance of this day, a small programme was organized by our learners. which included Welcome speech, patriotic songs, cultural dances and street play based on patriotism and fundamental rights.

Our learners learnt the valuable lesson of being dutiful citizens towards our beloved country.

Republic Day Celebration at TSGE

Thank You

Stay tuned for the Feb edition...
