Family Ties

FAMILY

TIES ARE PRECIOUS THREADS
NO MATTER WHERE WE ROAM
THEY DRAW US CLOSE
TO THOSE WE LOVE
AND PULL OUR HEARTS TO
HOME

Wonder Years

Nursery

This is the great way for your child to practice dexterity and gross motor skills. They will intuitively begin to grasp the concept of absorption as they work with sponge/napkin. The hidden lesson within this playful activity is that of how to clean up after the spill. The learners are developing a foundation of being independent working with a sponge/napkin for when real messes may occur further down the road.

We humans possess 5 senses like seeing, hearing, smelling, tasting, and touching to help you notice the world around you. Learning about them helps children explore the world around them. For better understanding of the same, learners of Prep I explored the sense of taste by blindfolding and tasting different food items.

Prep I

Story Reading - Nursery

Our learners shared stories with each other which stimulated their imagination and developed their social skills!

Sense of Sight - Nursery

The best way for young learners to learn about their senses is for them to take part in rich learning experiences through play. Senses usually work in conjunction with each other, and the sense of sight is often central. It also helped our facilitator to introduce the topic of sight, impart information about this important sense, and spark circle-time discussions. They saw around the class room with transparent and colored lenses in binoculars, played peek-a-boo and blind man's bluff games. They went on a nature trail around the school.

This type of play benefits sensory development in many areas, such as cognition, language, motor skills, creativity, and problem solving.

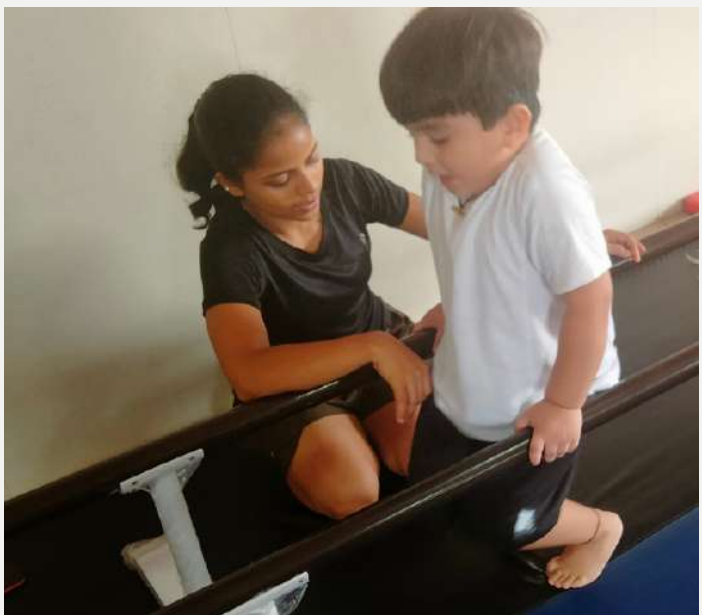

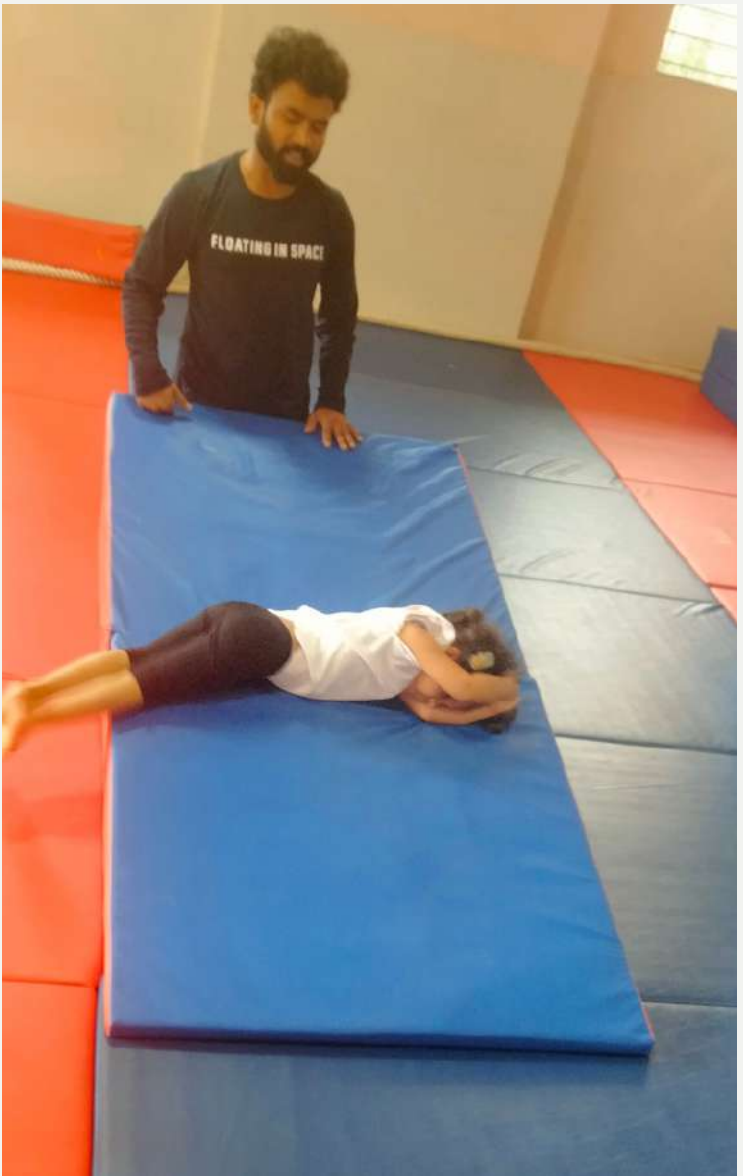

Gymnastics Tactics - Nursery

Gymnastics helps children to experience self-confidence through creative performance and helps to lay strong foundation for other sports that a child might express interest in. Learners also learn to listen, follow directions, work as a team, and even take turns.

AB Pattern - Nursery

Our littlest learners get introduced to sequence with this ab pattern which is a hands-on fun activity to grasp the concepts.

Dexterity and Gross Motor skills - Nursery

This is the great way for your child to practice dexterity and gross motor skills. They will intuitively begin to grasp the concept of absorption as they work with sponge/napkin. The hidden lesson within this playful activity is that of how to clean up after the spill. The learners are developing a foundation of being independent working with a sponge/napkin for when real messes may occur further down the road.

Sense of Taste - Prep 1

We humans possess 5 senses like seeing, hearing, smelling, tasting, and touching to help you notice the world around you. Learning about them helps children explore the world around them. For better understanding of the same, learners of Prep1 explored the sense of taste by blindfolding and tasting different food items.

Paths to Literacy - Prep I

Paths to literacy- Learners of Prep I, narrate stories in their own word with peers.

Math Odd and Even Activity - Prep II

Learning math with a story

Prep II children grasp the concept of odd and even. With a lovely story and puppets. The children are participative and hands-on learning prevails to strengthen the concept. By converting maths into a story, children find a rhythm with the numbers that had not been there previously. Adding in silly voices, colours and conversation takes away the scariness and makes it fun and familiar.

National Park Picnic - Nursery to Grade II

Education and learning processes should not only be limited to the classroom environment. The real-world connection and hands-on experience are proven methods of better learning. Theoretical knowledge in the books is not always enough to furnish the essential information to the students. The retention of a concept is better when the student experiences it practically. Field trips act as a significant help in this area. To enhance this experience the learners of Wonder Years were taken to Sanjay Gandhi National Park where in they were shown a short movie on the Silonda Trek and taken on a lion safari by bus and saw different animals like deer, tiger, monkey, snake and different types of insects and trees. The learners were excited and enjoyed the whole trip.

Cooking Special Activity - Grade IV

Cooking with kids is not just about recipes, ingredients and cooking, it is about harnessing imagination, empowerment and creativity. Here presenting grade IV learners using their cognitive skills to the fullest.

Ashoka University Orientation Report

Learners of Grades AS and A Level students attended a comprehensive orientation by the Ashoka University representative. Ma'am started by introducing herself and making the students do an activity to highlight the skills of communication and teamwork which students will learn during the course taken at Ashoka University.

There was a lot of information shared about the freedom to choose subjects of their interest and have a major-minor option too. For advanced levels, there is also a 4th year Post-graduate course. Their courses give an introduction to critical thinking along with many other vast topics and give students the opportunity to explore them during the years spent. Students will also be able to convert their subjects from minor to major and major to advanced major in their 4th year. Ashoka University emphasises on profile building such as passion and talent when it comes to admissions and requires a personalised essay. After students are selected, they conduct an aptitude test and finally, an interview. Scholarships are available and they have 4 intakes annually. Students can choose to stay on campus. They also have 55+ student-led clubs and societies on campus. After graduation, 350+ companies come to hire capable students directly from the university. They also have pre college summer courses in the month of May (YSP) for more information, one could refer to their website.

The orientation was extremely fruitful as many students loved the campus and the course options available.

Investiture Ceremony

On July 7, Thakur School of Global Education hosted a solemn ceremony to bestow upon our newly elected and well-deserving student council body with their responsibility of leading our school with commitment, confidence and competence. We had with us some important people amongst us such as our chief guest, Mr. Vinod Pradhan, who is an ex-navy officer and now trains students across Mumbai, including our own, for band competitions. The occasion was also graced by the Principal and Vice-Principal of Thakur International School, ICSE.

The members of the council were entrusted to shoulder their respective responsibilities by our chief guests. The council led to take an oath by the Head Boy, Head Girl and Sports Captain to enable the leaders to realize their duties and execute them efficiently. Our new student council was bequeathed with badges and sashes by the dignitaries and teachers. The four house vice captains and class prefects also received their badges. There were some melodious song and graceful dance performances by students of Grades VI and VII. Toppers for the IGCSE and A levels examination were also felicitated for their stupendous achievements.

The school draws its inspiration from the vision of our Trustee, Ms. Karishma Thakur, who ardently believes that every child who comes into the temple of learning must evolve an individual replete with knowledge, love for the nation, respect towards elders and show love to their parents.

Students are the torch bearers for tomorrow. Therefore, nurturing them and fostering in them a sense of self-respect, self-discipline and leadership is necessary. The contribution made by a council for the development of school policy in a number of areas can have significant benefits for students and the school.

Bastille Day

Bonjour!!!!

July 14, "la Fête Nationale" in France (French National Day) marks the fall of Bastille, a military fortress and prison, when an angry mob stormed into it, signalling the beginning of the French Revolution. Every year in France, there are military parades and fireworks to celebrate this gracious day. In TSGE it was no less. Our students marked the occasion of Bastille Day with great pomp and show. There was a sublime skit informing the students about basic French salutations. Following the skit, we had a melodious song by the 10th graders. There was an informative map made by the 10th graders indicating the famous monuments of France. The same monuments were made and showcased by the 7th, 8th and 9th grade students with explanation about the monuments for the lower grades. The 6th grade learners displayed the famous and delicious French cuisine. It was a thrilling day for not only the students, but I am sure also for the teachers of TSGE.

Global Triumph Foundation Award- for ISGE

Planting Saplings - TSGE Students

'To plant a garden is to believe in tomorrow.'

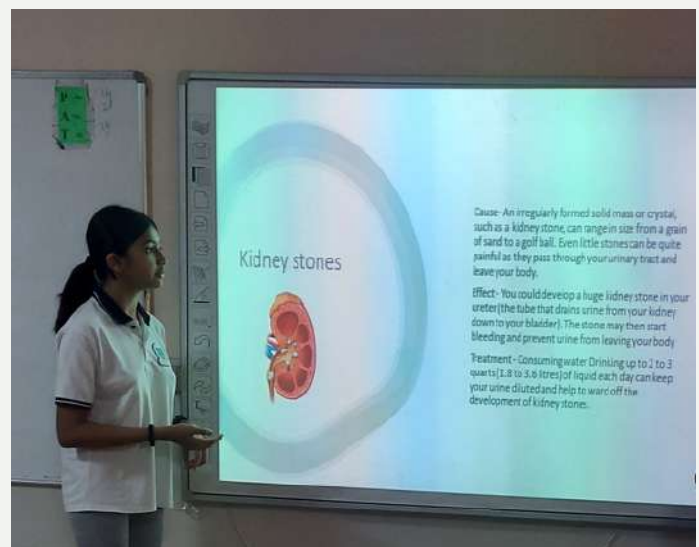

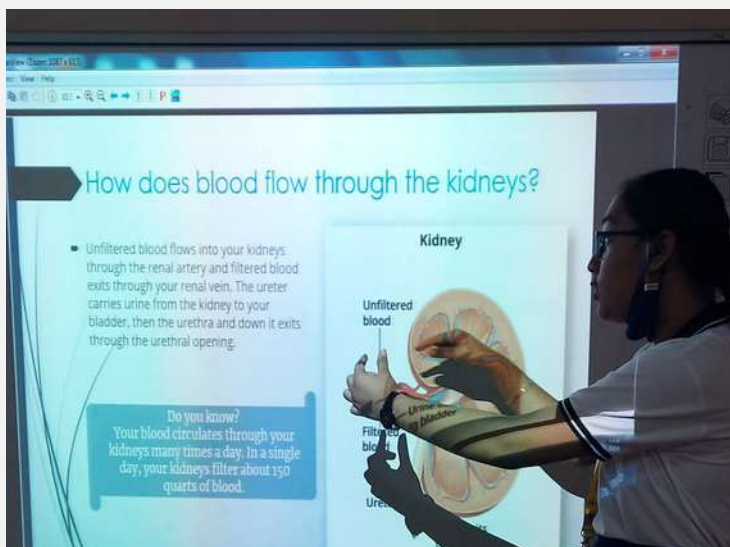

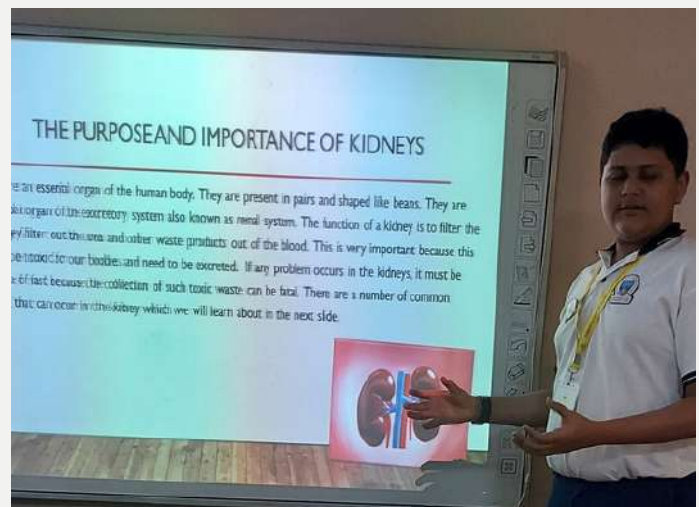

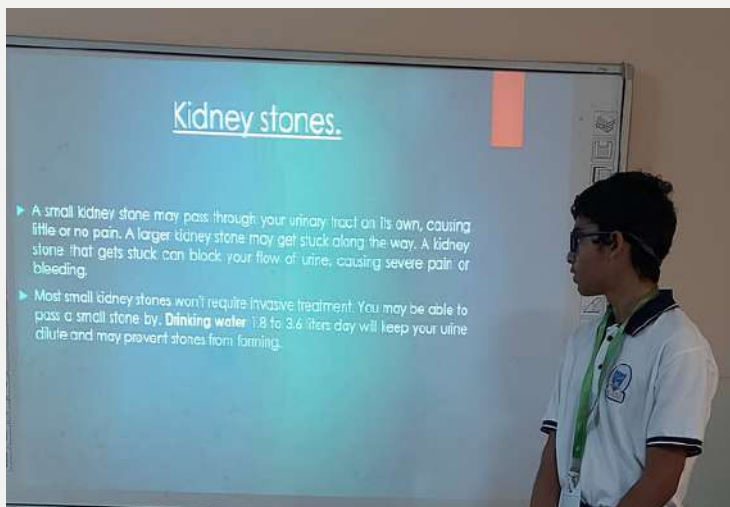

– Ruskin Bond

Here's to this garden of hope for a better tomorrow! The Green Warriors of our school, across grades from the Wonder Years to Grade VIII, planted saplings in the school backyard, for 'Save the Soil' project. The learners cheerfully planted the saplings. We are grateful to our management for such learning opportunities.

Research work on kidney problems - Grade VIII

Learners of grade VIII presented their research work on kidney problems like the different causes and symptoms of kidney related- diseases and also spoke about the various ways of treating it.

Monteria Picnic - Grade V to A Levels

The students of Thakur School of Global Education were all charged up for their trip to Monteria Village. Monteria is a village near Khalapur having scenic views, adventure activities and a lot more. The students enjoyed in the bus by listening to music, playing and enjoying their hearts out with their friends. From the pool party, DJ dance and scrumptious meals to humble traditional games and pottery making, the learners enjoyed their trip to the core.

Debate Competition

As the saying goes, 'Don't raise your voice, improve your argument.' A debate is one of the academic activities that give students a creative room to express what they feel. The length and breadth of knowledge that they gain through this is simply unparalleled. It boosts the learners' self-confidence of expressing their views in front of others.

A Preliminary round of the Interhouse Debate Competition was scheduled on 22nd July, 2022 at Thakur School of Global Education. The debate competition was organised for learners of Grade V to A levels during school hours. Age appropriate topics sparked the debate which then scaled up with the passage of time.

During the debate, the environment was regulated as the exchange of ideas and arguments took place. The participants were all set and equipped as they let out the reasonable and precise words flow out of their mouth. The participants, armed with statistics and data that made their arguments more vehement with their righteous facial expressions and voice modulation. They exhibited great oratory skills. The judges judged the entire debate by monitoring the allotted time for discussion, scoring them in order to entitle the winner for final round. Undoubtedly, the competition was an enthralling experience for the speakers as well as the judges.

Mindler Immrse

On the 20th of July, the school had organised an orientation for grade IX to A levels. In this session, the creators of Mindler Immrse; Mr. Pratham Sutaria and Ms. Pooja explained to all of us about Mindler Immrse. It was a virtual career simulator which helped us understand what happens in life of a professional in a specific career. VCS is an educational course which offers us education about many careers like; law, psychology, medicine, teacher and lots more. By spending 30 minutes each day, one can finish 2 courses in just 2 weeks. At the end of each course, the learner will be awarded with participation certificate and a 15-page report card. It was an eye-opening session for all the learners.

Monsoon Poem

“Far up in the deep blue sky,
Great white clouds are floating by;
All the world is dressed in green;
Many happy birds are seen,
Roses bright and sunshine clear
Show that lovely June is here.”

**-Ms. Hiya Pujara
(Correspondent, Grade VII)**

(IGCSE & A Levels)

Thank You

Stay tuned for the August edition...
