- A and AS Level Orientation

# Teacher's Induction

"We were thrilled to welcome our new teachers to our school community yesterday! Our Head of School took them on a journey through our school's history, ethos, vision, and values, setting the tone for an incredible year ahead. Let's take a look at the highlights from our induction day!"

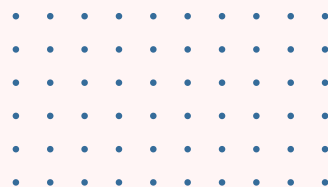

# Father's Day Celebration

In celebration of Father's Day, a heartwarming performance of paternal love and affection, the dance hall of TSGE School resonated with the sweet melodies of children's voices on Father's Day.

Followed by a fantastic sports spirit on the badminton court at TSGE School, it reverberated with the exciting sounds of shuttlecocks being smashed and games being won. Fathers, accompanied by their children, and wives gathered at the school's badminton to participate in a thrilling badminton tournament. The event, organized by the Wonder Years team, aimed not only to honor fathers but also to foster bonding moments between parents and children through the spirit of sportsmanship.

Laughter and friendly banter filled the air, setting a jovial atmosphere for the day's festivities. Fathers, ranging from seasoned players to enthusiastic amateurs, teamed up with their children to form dynamic duos ready to conquer the courts. Each match was a display of skill, agility, and teamwork, with spectators cheering on their favorite teams from the sidelines.

As the final shuttlecock was gently laid to rest, the echoes of cheers and applause reverberated throughout the school. The Father's Day badminton tournament at TSGE School not only showcased athleticism and sportsmanship but also created enduring memories of joy and togetherness for families. Through the power of sports, fathers, and children forged deeper connections, strengthening the bonds that would last a lifetime.

# Listening Skills in Grade III

In our Grade III classroom, we recently conducted an engaging activity designed to enhance listening skills among students. Recognizing that effective listening is crucial for academic success and interpersonal communication, we aimed to create an interactive and enjoyable experience that would captivate our young learners' attention while fostering their auditory abilities.

Activity - Learners were divided into 2 groups. Group 1 were of observers and Group 2 were of listeners. Observers were shown an image on the desktop and given a few minutes to observe every detail of that picture. They had to go back to their respective team members of listeners and asked to describe the image. Listeners had to draw and create the image on a sheet by just listening to the description by observers.

Objective - Promote Listening skills, enhance observation and structured thinking.

Reflection - The "Observe & Listen" activity proved to be an effective and enjoyable way to promote listening skills in our Grade III class. We look forward to incorporating similar activities in the future to continue nurturing these essential skills.

# Story session : Prep I

Brightening the day of the students with wonderful stories a storytelling session was conducted where life and expression were in abundance. As a learning tool, storytelling can encourage students to explore their unique expressiveness and can heighten a student's ability to communicate thoughts and feelings in an articulate, lucid manner. It helps improve their language skills, instills a love of reading, and stirs their imagination. To encourage the skills of listening and reading, at TSGE in Prep I the facilitators take storytelling sessions daily. It was an interactive session that was thoroughly enjoyed by the learners.

# Fine motor activity lacing - Prep I

It is important to engage children in a fun and educational lacing activity that enhances fine motor skills, hand-eye coordination, and concentration. At TSGE each child is provided with a shape, and yarn, and demonstrates how to start threading through one of the holes. Learners explore different ways to lace the yarn through the holes, promoting creativity and problem-solving. Learners then share their finished lacing creations with the group. Discuss their designs and what they enjoyed about the activity.

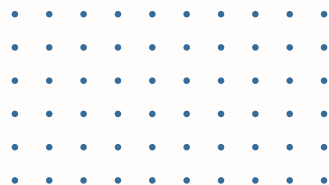

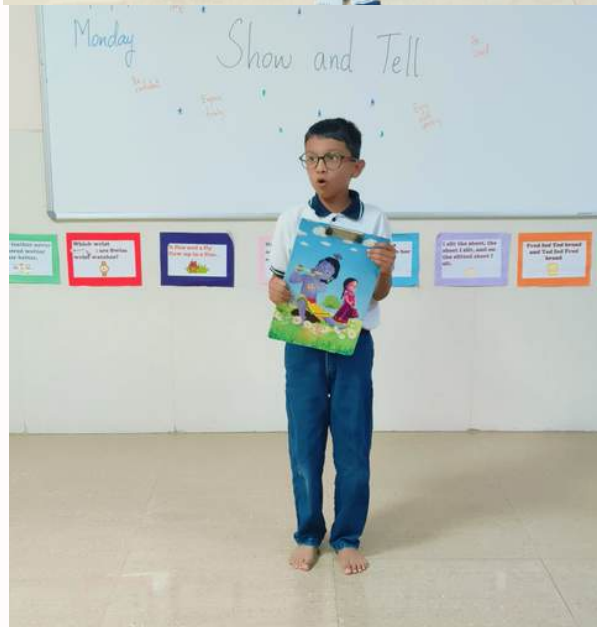

# Show and Tell - Grade II

The Show and Tell event was organized on 10/06/24, Monday to strengthen the verbal skills and to foster public speaking competency of the young minds.

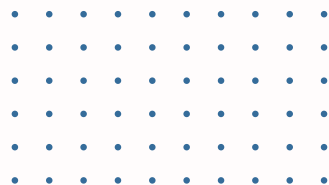

The students from Grade II participated in this activity which helped them to build their self-confidence and self-esteem. It enabled them to improve their descriptive skills by communicating feelings, thoughts and emotions with words.

The students were informed to bring their favourite toy or any object of their choice. They were excited to share their descriptive narration and waited eagerly for their turn to show and tell. Thus, this event helped our little learners to build their social, emotional and language skills.

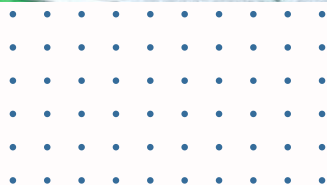

# Neltas- Grand final result

It gives us immense pleasure to inform you that Thakur School Of Global Education learners have achieved outstanding results in the NELTAS prestigious competition, competing alongside more than a thousand students representing over 400 schools and 250+ cities in India. The results serve as a testament to their resilience and potential for future success. Congratulations to all the learners.

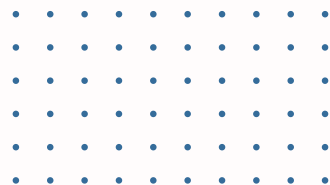

# Kinetic Sand Activity - Nursery

At TSGE we engage the learners in a fun way, while playing kinetic sand activity in class, we provide learners with an opportunity to learn through play, fostering creativity, social skills, and sensory exploration enjoyably and educationally. Nursery learners were encouraged to explore the texture of the sand with their hands. The facilitators let them squish, squeeze, and mold the sand freely.

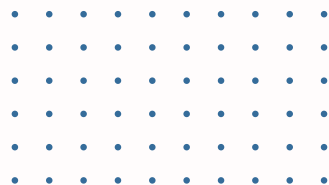

# Yoga Day celebration with Yoga topics Health Care Centre

On April 6th, 2024, Thakur School of Global Education witnessed a captivating fusion of social studies and dance as Grade 3 and Grade 4 students showcased the Ramayana and The Later Vedic period. Through vibrant performances, they illustrated their understanding of these historical narratives, captivating parents, teachers, and peers alike. The Student Led Conference provided a platform for the students to demonstrate their academic and artistic prowess. Their seamless integration of academics and artistry highlighted the school's commitment to holistic education. The event was a testament to the school's dedication to nurturing well-rounded individuals. Through their performances, the students transported the audience back in time, offering a glimpse into ancient tales and traditions. It was a memorable celebration of learning, culture, and talent at Thakur School of Global Education.

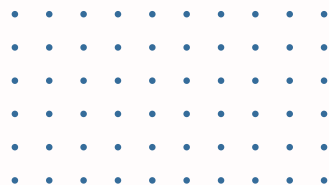

# Indoor activity (carrom) - Nursery and Prep I

A game such as the Carrom board requires a heightened sense of hand-eye coordination along with an ability to figure out the angles, how much power to use and the strategy to be deployed to land the queen as early as possible. At TSGE we start them young, and our Prep I learners learn to play carrom. Playing carrom board can help develop all these cognitive and motor skills which are extremely critical for their holistic development.

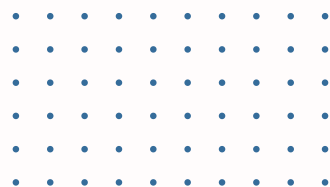

# Story telling - Nursery

An intriguing story time session at TSGE with our learners. Learners are allowed to imagine and stimulate their sense of thought. Our stories for nursery class in English can take many forms, including puppet shows, music, comedy, and poetry. In addition to enjoyment, storytelling has numerous benefits for their literacy and language development. Stories from such a tender age have a lasting effect on their personality development too.

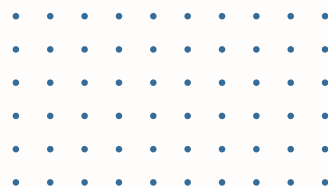

# Nursery - Pictures for soak and squeeze water play Activity

In the nursery class at TSGE, the activity of soaking and squeezing serves as a fun and educational experience designed to engage our young learners in sensory exploration and motor skill development. Soaking and squeezing activities are carefully crafted to stimulate the senses of nursery learners through hands-on engagement with materials like sponges, cloths, or even toys in water. These activities are not just about getting wet; they are structured to foster cognitive, social, and physical development in a playful environment. Throughout the activity, teachers facilitate discussions about what the children observe, reinforcing vocabulary related to the activity (wet, dry, heavy, light, etc.).

# Nursery - Paper tearing Activity during the Art Class.

Paper tearing is a fundamental activity in nursery classes that aids in the development of fine motor skills among young learners. This activity not only Paper tearing is a fundamental activity in nursery classes that plays a crucial role in the development of fine motor skills among young learners. By engaging in this simple yet effective exercise, nursery learners at TSGE enhance their hand-eye coordination, which is essential for performing more complex tasks as they grow. The act of tearing paper requires precision and control, helping to strengthen the small muscles in their hands and fingers. This improvement in dexterity is foundational for other activities such as writing, cutting with scissors, and even tying shoelaces. In addition to its developmental benefits, at TSGE we aim to provide a sense of accomplishment and boost their confidence as they see the results of their efforts. Furthermore, this activity was a collaborative experience, promoting social interaction and teamwork while they worked together to create a collective artwork. Overall, paper tearing was more than just a fun pastime; it was a valuable educational tool that laid the groundwork for future artistic and cognitive abilities in our young learners.

# Paper Crumbling

Tearing and Crumpling are a great workout for little fingers and one that is important for building fine motor skills in early childhood.

Tearing and Crumpling as an activity is beneficial in many ways. Tearing strengthens the muscles of the fingers and the whole hand. It develops fine motor control which is necessary for learning to write and it improves eye-hand coordination.

To enhance this skill for our Prep II, Paper Crumbling is a simple craft activity that involves paper tearing, crumpling, and pasting paper balls onto a sheet of paper/given template. They enjoyed doing the activity thoroughly!

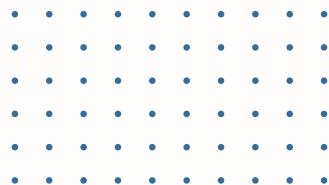

# A and AS Level Orientation

A heartfelt thank you to all the parents who joined us for today's orientation session!

Our Head of School and IGCSE/A Level Coordinator shared crucial insights to ensure the learners' path to success:

- ☀ Highlighting the pivotal role of IGCSE and A Levels in shaping their future
- 📖 Upholding our school's legacy of excellence, perseverance, and creativity
- 📅 Overview of examination timelines and patterns
- 📎 General instructions, school rules, and daily operations
- 🎉 School recreation plan to promote holistic development
- 🎨 Extracurricular activities aimed at fostering talents and interests
- 🌐 Tie up with our career counseling cell and its role in guiding students.

Your unwavering support and partnership are invaluable as we embark on this educational journey together. Let's work hand in hand to make Grade 10 and A Levels a fulfilling and successful experience for your child!

(IGCSE & A Levels)

# THANK YOU

Stay tuned for the July 2024  
edition...
