Field trip to Growell's mall

Field Trip to Growell Mall: Exploring Retail Community Helpers

On 2nd September 2024 the younger learners of TSGE embarked on an exciting field trip to Growell Mall, visiting the supermarket and Crossword book store. This adventure aimed to introduce our curious students to the world of different types community helpers, fostering an understanding of their roles and responsibilities.

Supermarket Exploration

Upon arrival, our students met the friendly store manager, who welcomed them and explained the supermarket's operations. As they wandered through the aisles, they encountered various staff members, including cashiers, shelf stockers, and security personnel. The children eagerly asked questions, learning about each helper's tasks and importance in ensuring the store runs smoothly.

Crossword Book Store Discovery

Next, the students visited Crossword Book Store, where they met the knowledgeable staff. The children explored the different sections, marveling at the vast array of books. They discovered fiction, non-fiction, and children's books, sparking their imagination and curiosity. The staff shared their passion for reading, highlighting the significance of books in our lives.

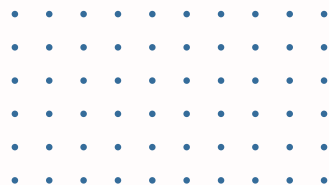

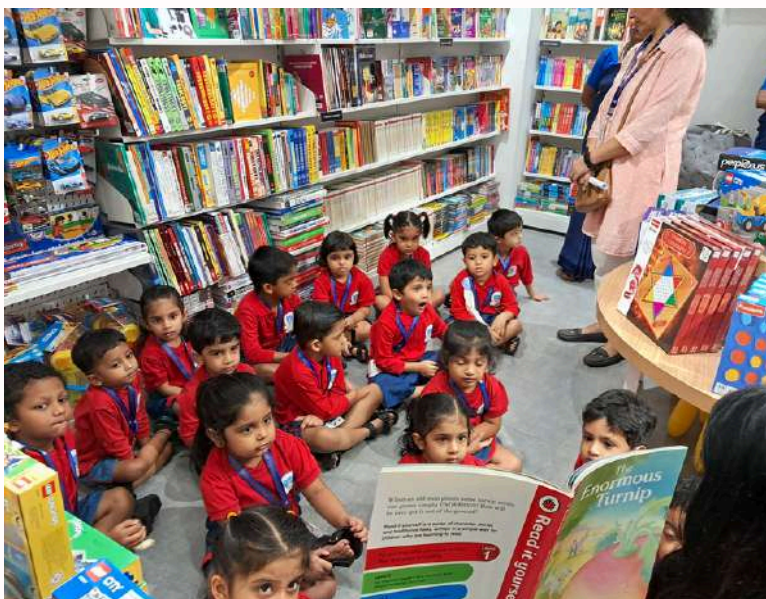

Learning and Fun

Throughout the trip, our young learners engaged in interactive experiences, observing and asking questions. They developed essential social skills, building confidence in communicating with community helpers. The trip culminated in a deeper understanding of the different community helpers sector and appreciation for the people who make it function.

Reflection and Sharing

Back at school, the students reflected on their adventure, drawing and writing about their favorite community helper. They shared their experiences with peers and teachers, reinforcing their newfound knowledge.

This field trip to Growell Mall was a resounding success, providing our youngest learners with a valuable introduction to many other community helpers. By exploring the supermarket and Crossword book store, they gained a deeper understanding of the importance of these helpers in our daily lives.

Grade VI - weathering activity

Our Grade 6 - Social Studies class took learning outside the textbook and into the real world with an exciting hands-on activity on weathering!

The students explored three types of weathering: chemical, biological, and mechanical, using everyday materials. They observed how vinegar breaks down chalk for chemical weathering, how plant roots can crack rocks for biological weathering, and how ice expands to cause rock fractures for mechanical weathering.

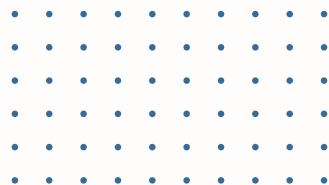

It was a fantastic way to see science in action and understand the processes that shape our planet. Our learners had a blast and gained a deeper appreciation for the forces of nature!

Ganapati Celebration at TSGE

Ganapati celebrations at our school were vibrant and joyful! Having learners dressed in their best attire added a special touch to the occasion. Welcoming Ganpati Bappa with such enthusiasm, dancing, and offering prayers created a festive and spiritually enriching atmosphere.

The handmade desiccated coconut laddoos were a delicious and thoughtful touch, connecting learners to the traditional aspects of the festival. The celebrations included both cultural practices and creative activities, making the event memorable and meaningful for everyone involved. Celebrations like these are wonderful for fostering a sense of community and cultural appreciation among learners!

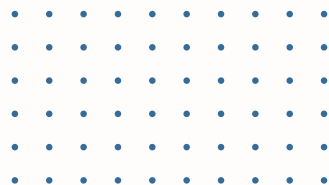

Universities Meet - MINDLERS

The event buzzed with excitement as parents, teachers and students gathered to explore a world of opportunities. From engaging interactions with university representatives to insightful discussions about future pathways, every moment was filled with anticipation and dreams.

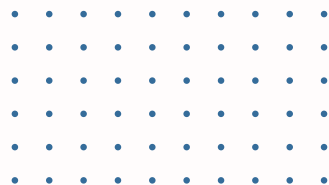

Students showcased their curiosity and ambition, eagerly asking questions and soaking in valuable information. Parents shared their pride and hopes for their children, while teachers guided and supported each student's unique journey. The energy in the air was palpable as everyone envisioned the possibilities ahead!

Here's to new beginnings and the bright futures that lie ahead!

One Day Picnic - Durshet

Our one-day picnic at Durshet was the perfect escape from the hustle and bustle of daily life. Surrounded by lush greenery and the soothing sounds of nature, we spent the day hiking scenic trails, enjoying a delicious picnic spread, and bonding over fun games. The picturesque landscapes offered countless photo opportunities, capturing the joy and laughter shared among friends and family. As the sun began to set, we reflected on the beauty of the day, grateful for the time spent in this serene paradise.

Global perspective + Gymnastics (Activity)

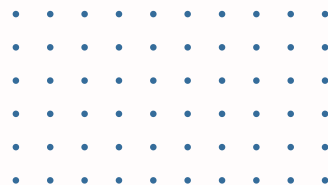

At TSGE, we emphasize the importance of fitness in fostering a balanced mind and body, which is essential for the holistic growth and development of our learners. To promote practical and experiential learning, Grade 4 students engaged in a collaborative session that integrated Global Perspectives with gymnastics, led by our Gymnastics Coach. During the session, students practised pull-ups, push-ups, planks, balancing exercises, and stretching routines, reinforcing both physical fitness and global awareness."

Anup Sir,

I am delighted to share that our Incredible Mallakhamb team has set a Guinness World Record for the "Fastest Time to Complete 5 Synchronized Elements on the Pole Mallakhamb." This remarkable achievement was accomplished by our young talents, Swaransh More and Shriram Jadhav, both aged 9, who received the award in 2023 and 2024.

The event took place in Milan, Italy, under the guidance of Incredible Mallakhamb, with me, Anup Thakur, serving as the head in charge. I am immensely proud of our students and the entire team for their dedication and hard work in representing India on such a prestigious platform.

Thank you for your support and encouragement.

Montessori and rolling pin activity - Nursery

Let's learn whilst playing, At Thakur School of Global Education (TSGE), nursery learners thrived in a playful and engaging environment where learning was seamlessly integrated into play. The Montessori activity of Rolling Play Dough is an essential component of the Practical Life area, specifically under Care of Environment, providing children with a sensory-rich experience. Nursery learners used the rolling Play Dough in the Montessori setting that involved using hands to shape and manipulate dough into various forms. This activity is not only enjoyable but also serves as a practical exercise that enhances children's fine motor skills and sensory perception.

The repetitive action of rolling and molding the dough helps our learners to focus on the task at hand, fostering a clear and engaging learning experience.

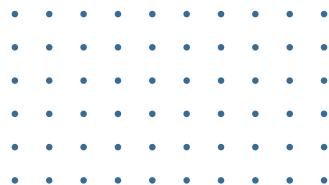

Grandparents Day Celebration

The Grandparents Day celebration at Thakur School of Global Education was a heartwarming affair, filled with joy, nostalgia, and lively festivities. The event brought grandparents and their grandchildren together for a day of bonding and fun.

One of the highlights of the day was the beautiful musical journey, where the grandparents took a trip down memory lane by singing songs from their era. The melodies evoked memories of a bygone time, allowing everyone to share in the history and culture of the older generation.

Adding to the festive spirit, an “Art Attack” activity encouraged creativity as grandparents and grandchildren collaborated to make decorative Shubh Labh door hangings. This craft session provided an opportunity for them to work together, creating keepsakes to cherish. The energy of the day reached its peak with a vibrant Garba dance session. Grandparents, along with their grandchildren, danced enthusiastically to the rhythmic beats, filling the space with infectious energy.

The entire celebration was a fantastic experience, filled with love, laughter, and cultural pride. The day was truly one to remember, filled with grand fervor that strengthened the bonds between generations at Thakur School of Global Education.

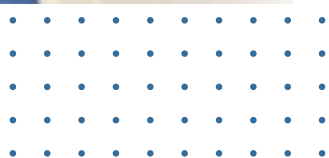

Grade IV _ Science Lab activity

I am excited to share some highlights from our recent Grade 4 science investigation, 'Flowing Solids ."

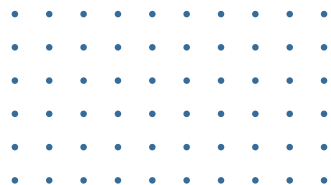

Curious Minds in Action! Our Grade 4 learners conducted a fascinating investigation into the flow properties of solids. Using everyday materials like wheat flour, sand, salt, sugar, and gram flour, they explored texture by touch—identifying each as rough or smooth—then measured how long it took for 100 ml of each solid to flow through a funnel. Results were recorded and visualized in a graph, showcasing the unique flow rates of each material. A fun, hands-on way to learn about the properties of solids!"

Attached are some pictures capturing the students in action as they carried out their investigation. It was a fun and insightful experience for everyone!

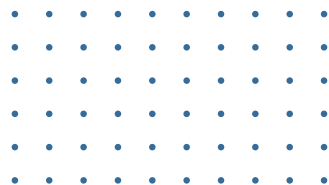

Grade IV _ "Changing the Shape of Water."

Curious Minds in Action: Investigating How Water Changes Shape! Our Grade 4 learners conducted an exciting experiment in the science lab, using equipment like beakers, test tubes, petri dishes, conical flasks, droppers, and bowls. Through hands-on exploration, they discovered how liquid particles move and adapt to the shape of each container. A fun and educational dive into the world of liquids!"

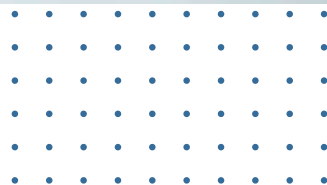

Community helpers activity - Nursery

Role-playing as doctors and patients not only makes learning fun but also helps kids understand and appreciate the role of community helpers. By creating their own doctor's sets, learners get hands-on experience with the tools and uniforms associated with the profession. As they take turns pretending to be doctors and patients, they're practicing empathy, communication skills, and problem-solving.

Education Augmented Reality

Using augmented reality (AR) cards to teach community helpers at TSGE is a great interactive learning tool learners. Prep I learners get a fun exploring experience with Community Helpers we included various helpers such as police officers, firefighters, doctors, teachers, etc. The content can show them in action in their roles.
